

**GO! CO-OPERATIVE**

a multi-stakeholder  
transport co-operative

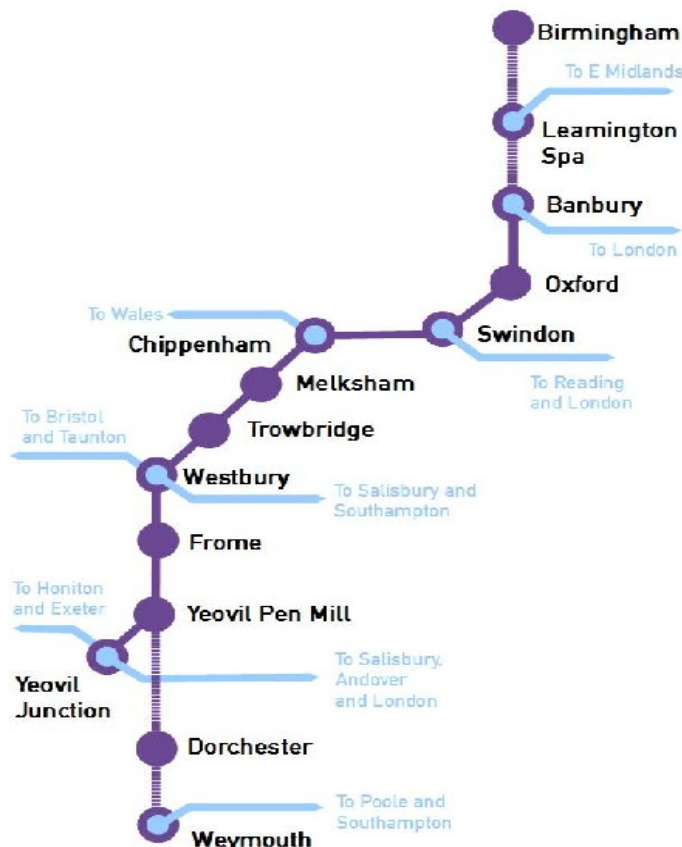

## INVITATION

### *to the launch of the UK's first co-operative train operating company!*

Come along to hear our plans and learn how you can get involved in this new co-operative business, aiming to empower passengers throughout the UK. Our mission is to reduce the social and environmental impacts of travel by providing mutually owned, high quality, inclusive public transport services that encourage people to choose more sustainable options.

We intend to do this in three ways:

- Open access rail services on the national rail network
- Bus and light rail 'feeder' routes
- Development of car clubs

We have identified a cross country route that offers excellent potential for social and financial returns on investment. It uses existing track in a new way, to provide a real alternative to car travel.

We aim to be running services on this route in 2011.

Launch events are being held during April 2010 in four towns on our proposed route: Yeovil, Trowbridge, Swindon and Oxford. See over for venue details.
